

## Annual Report for Campus Environment Promotional Activities

Academic year: 2022-23

The academic year 2022-2023 was marked by numerous initiatives aimed at promoting a sustainable and eco-friendly campus environment. Through strategic planning and collaborative efforts, we endeavoured to raise awareness, foster community engagement, and implement sustainable practices across campus. This annual report provides an overview of the various activities undertaken and their impact on our campus environment.

### Impact and Outcomes:

- Increased awareness and consciousness among students, faculty, and staff regarding environmental issues and sustainable practices.
- Significant reduction in waste generation through improved recycling and waste management efforts.
- Enhanced biodiversity on campus through tree plantation drives and the establishment of community gardens.
- Substantial savings in energy consumption achieved through energy conservation measures.
- Strengthened community engagement and collaboration towards a shared goal of creating a greener campus environment.

### Future Directions:

Building upon the successes of the past year, we aim to continue our efforts towards promoting sustainability and environmental stewardship on campus. Some proposed initiatives for the upcoming academic year include:

- Expansion of community garden spaces and introduction of composting facilities.
- Integration of sustainability education into the academic curriculum across disciplines.
- Collaboration with local businesses and organizations to further support sustainable initiatives.
- Continued monitoring and evaluation of campus environmental impact, with a focus on setting and achieving measurable targets for improvement.

### Key initiatives:

The Responsible Invertian club organized an event Clean Campus, Dream Campus from on 30 March 2023 in order to create an awareness about clean and green campus. Faculty members and students actively participated in the campaign by displaying posters with slogans of the same. They were also informed to make the campus & classrooms a beautiful place for one and it makes individuals healthier when the environment around them is healthy. Clean Campus promotes Hygiene, It improves hygiene level in campus and also helps to reduce the spread of sickness, maintaining a clean college environment sets a good example to students.

Cleanliness encourages learners to take pride in their college, which makes them less likely to drop litter and as such they will potentially make a bigger effort to maintain their environment. Cleanliness gives rise to a good character by keeping body, mind, and soul clean and peaceful. Maintaining cleanliness is the essential part of healthy living because it is the cleanliness only which helps to improve our personality by keeping clean externally and internally.

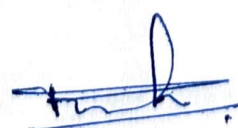

Eco-Drive inside campus of Invertis University was organized on 10 Nov 2022 that began with a beautiful message shared by our Vice Chancellor which motivated everyone to preserve environment by using eco-friendly goods. Various activities were designed for students and faculty members to keep them aware of environmental issues and the ways to deal with them. They made green crowns, organic bird feeders, eco-friendly bags, and posters with slogans on the theme 'Ecosystem Restoration' and planted saplings at their homes.

Invertis University organized an event with a message of 'More Plantation, More Oxygen' on Environment Day i.e. 5<sup>th</sup> June 2022 in campus for the students and employees of University. The objective of the event was to raise awareness about the importance of green environment in current living scenario. Due to increase in pollution the global warming in turn is affecting the environment to massive level. In order to bring about a significant change we need to motivate every individual to make this a part of their life. Without trees life is not possible, therefore the club has taken this initiative to motivate faculty and students to participate in this event.

An event 'PRESERVE GREEN, RESERVE WE' was organised at Invertis University on 18 August 2022 wherein students were told about the importance of preserving greenery for saving future generations and a unique street play competition on "Environment for today and future generations" was conducted. A number of teams from various departments of the university registered themselves for the competition and presented their plays on topics such as global warming, cleanliness, save Earth, etc. Students presented stunning performances and raised numerous important issues which made the audience realise the importance of their planet and the need to value it. Students urged everyone to plant more trees and make small changes in their daily life such as switching off gadgets not in use, conserving water, etc.

**Conclusion:**  
The academic year 2022-2023 was characterized by proactive efforts to create a more sustainable and eco-friendly campus environment. Through a combination of awareness campaigns, collaborative initiatives, and practical measures, significant progress was made towards fostering a culture of sustainability within the campus community. As we look towards the future, we remain committed to building upon these achievements and furthering our collective efforts towards a greener and more resilient campus environment.
